LAVAL

## **Serge Leroueil, PhD, P.Eng**

Full Professor in Geotechnical Engineering  
Université Laval, Quebec, Canada

**terrà un seminario dal titolo:**

### **Sediments and mass movements in the Saguenay Fjord, Quebec, Canada**

**Venerdì 24 Giugno 2016 ore 12:00  
auletta didattica della sezione Geotecnica (DICATECh)  
Politecnico di Bari**

#### **Serge Leroueil**

Born in France, Serge Leroueil obtained his engineering degree in Civil Engineering from the Institut National des Sciences Appliquées in 1970. He obtained his Ph.D. in 1978 from Université Laval, Québec, Canada. After two years as geotechnical engineer with the firm Terratech in Montréal, he has moved to Université Laval, Québec, where he is professor since that time.

His main research interests are soft clays, structured soils, compacted soils, consolidation, embankments, cuts and natural slopes. He is co-author of about 250 technical papers, wrote about 25 Invited Lectures and was Rankine Lecturer in 1999. He is Fellow from the Canadian Institute of Engineers, Member of the Academy of Sciences of the Royal Society of Canada, and received the 2013 Legget Medal of the Canadian Geotechnical Society.
